

Is this Conservation Project Community-Based?

- Were the project's goals decided in conversations with locals from the start, or were they pre-decided?
- Is a local organization (or community group) leading or co-leading the effort?
- Is there an understanding that the project may take 5 years or more?
- Is the initial scope of the project small, such as a specific town or habitat?
- Are community members involved in wildlife monitoring, appropriate tourism, educating children, etc. in some way that they themselves feel is beneficial?
